<https://github.com/YessicaRomero>

I am a full stack developer passionate about constantly learning and improving. I love facing new challenges and working on technological solutions that make a difference. I combine technical and soft skills to add value to each project, working in a team, solving problems and adapting quickly to any environment or technology.

EDUCATION

2023 - 2024

Full-Stack Developer

Unicen - Cluster Tecnológico Tandil

React curso Alaura Latam

EXPERIENCIA LABORAL

- **Customer service representative**

This improved my communication skills helping diverse clients and addressing their needs effectively.

Strengthened teamwork collaborating with colleagues to provide excellent service.

- **Full Stack Developer(March/December 2024)**

I designed and developed an interactive game of questions and answers, learning and applying new technologies in the process.

I collaborated remotely with a team of 4 people, promoting effective communication and teamwork.

I used **React, Bootstrap, Figma, Font Awesome, NestJS, TypeORM, and MySQL** to create an engaging and functional user experience.

I implemented tools like **Postman, Git, and GitHub** for testing, version control, and project management.

- **Front End Developer(1 month)**

I led the development of a landing page focused on highlighting services and promotions, using **React and Bootstrap**. I worked in a team of 3 developers, applying **Scrum** as an agile methodology for the organization and monitoring of the project. We use **Git** and **GitHub** for efficient version control and collaboration.

SKILLS

- **Frontend Development:** **HTML, CSS, JavaScript, React, Bootstrap** and **Tailwind** for creating responsive and user-friendly interfaces.
- **Backend Development:** **Node.js, NestJS, and TypeORM** to build robust and scalable server-side applications.
- **Testing & Quality Assurance:** unit and integration tests using **Jest**
- **Database:** **SQL** and **MySQL** for data modeling and query optimization.
- **Tools & Methodologies:** Experienced with **Git, GitHub, Postman, Trello** and **Scrum** for efficient project management and version control.
- **Authentication:** implementing secure authentication with mechanisms using **JWT (JSON Web Tokens)**.

SOFT SKILLS

- **Teamwork and collaboration.**
- **Problem solving and critical thinking.**
- **Organization and time management.**
- **Adaptability and continuous learning.**
